// about

I build cloud-native products end to end — event-driven systems, Stripe billing, developer platforms, and voice apps for Alexa and Google. 13 years across the full stack and three clouds.

// experience

Senior Full-Stack Engineer

2025 – Present

Azumo LLC — San Francisco, CA

- Lead developer, owning technical direction alongside the delivery team.
- Focused on backend technologies: API design, data modelling and the services behind the product.
- Built event-driven services, with the infrastructure defined in SST and Pulumi.
- Worked as part of a cross-functional team, pairing and reviewing code to keep standards consistent.

Full-Stack Engineer

2024 – 2025

Proxify — New York, NY

- Designed and built an event-driven architecture for file processing and transactional email.
- Built the Stripe billing integration covering subscriptions, usage-based plans and webhooks.
- Redesigned the developer portal, improving the UI and end-to-end developer experience.
- Established CI/CD pipelines to accelerate and stabilize software delivery.

Senior Full-Stack Developer

2022 – 2023

Pinata — Omaha, NE

- Owned the public SDK and developer-facing repositories, the primary integration surface for customers.
- Led the migration of the legacy codebase from JavaScript to TypeScript.
- Designed the multi-tenant schema for organizations, sessions, files and per-plan access and usage.
- Partnered across front-end and back-end to establish shared standards and design patterns.

Full-Stack Engineer

2016 – 2022

Rain — Salt Lake City, UT

- Built websites and voice skills for Amazon Alexa and Google Assistant using Node.js, React, Next.js, AWS and NoSQL.
- Delivered serverless applications and single-page apps as the team's primary architecture.
- Owned automated build and deployment pipelines, plus unit test coverage and test automation.

Web and Mobile Developer

2013 – 2016

Dotcreek — San José, Costa Rica

- Engineered RESTful web services over dynamic datasets, and client-facing apps in Ruby on Rails, Node.js and Django.
- Worked directly with clients to scope, optimize and ship sites.

Backend Developer

2013

SIConsultores — Managua, Nicaragua

- Built APIs, data clients and reusable libraries on cloud-based back ends.
- Designed client- and server-side architecture, with high-coverage unit tests and tuned SQL.

// skills

Frontend

React, Vue, Angular, Next.js, Redux, Zustand, Tailwind, TanStack Query

Backend

Node.js, TypeScript, NestJS, Ruby on Rails, Python

Databases

PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, SQL Server, RDS

Testing

Jest, Chai.js, Nightwatch.js, Vitest

Cloud & DevOps

AWS, Google Cloud, Azure, Serverless, Firebase, Cloudflare, Cloudflare Workers, Cloudflare Pages, Vercel, Heroku, SST, Pulumi, GitHub Actions, GitLab, Bitbucket Pipelines

AWS

DynamoDB, Lambda, API Gateway, S3, CloudFront, CloudFront Functions, SQS, SNS, EventBridge, EC2, ECS, RDS, IAM, CloudWatch

// education & certifications

B.Sc. Information Technology

2010 – 2014

Universidad Centroamericana — Nicaragua

CISCO CCNA v4

2014

Cisco Certification

// languages

Spanish Native / Bilingual

English Native / Bilingual
